

Airborne Geophysics Completed over Two More Carube Copper Corp Jamaican Licences

Carp, Ontario – July 27, 2015 – Carube Copper Corp. (the “**Company**” or “**Carube Copper**”), (CUC:TSXV) is pleased to announce that OZ Minerals Limited (“**OZ Minerals**”) has received the final data set from a recently completed airborne magnetic and radiometric geophysical survey over Carube Copper’s 100% owned Main Ridge and Hungry Gully Special Exclusive Prospecting Licences (“**licences**”). OZ Minerals now has the right to option one or more of three projects as set forth below.

OZ Minerals Right to Joint Venture: Pursuant to the term sheet signed with OZ Minerals on May 30th, 2014, OZ Minerals had 18 months following the initiation of the BGJV to complete airborne geophysical surveys over the Company’s four wholly owned licences (three projects), namely the Hungry Gully, Above Rocks and Main Ridge projects in order for them to joint venture one, two or all three of the projects. OZ Minerals officially completed the airborne geophysical surveys on June 20, 2015 and must decide whether it will enter into a joint venture with Carube on any of the projects by December 20, 2015. The subsequent joint venture(s) will have similar terms to the current BGJV between the parties.

Vern Rampton, President and CEO of Carube stated,

“With the airborne geophysical surveys now completed over our wholly-owned Above Rocks, Main Ridge and Hungry Gully projects in Jamaica, OZ Minerals will be making a more informed decision on joint venturing one or more of these projects, setting the stage for expansion of their copper exploration in Jamaica.”

Ownership of Projects: Carube currently owns a 100% interest, subject to a 2% NSR royalty, in the four licences known as Hungry Gully, Main Ridge, Belvedere and Mt. Royal (see Figure 1). Carube will issue 1,200,000 common shares (the “**Common Shares**”) in the capital of the Company prior to July 30, 2015 to the former owners of these four Jamaican licenses. This represents the final obligation of Carube to maintain its interest in the projects. The share issuance is pursuant to an agreement dated December 3, 2013 between the former owners and Carube Resources Inc., the predecessor of Carube Copper Corp. The Common Shares are subject to a four-month hold period from the date of issuance in accordance with applicable securities law.

Summary of mineralized prospects at the Above Rocks, Hungry Gully and Main Ridge Projects.

The values listed below are historic and although the Company has not verified them, it believes them to be representative of the particular style of mineralization at each prospect.

Above Rocks Project:

- Glengoffe: mineralized porphyry, historic grab samples including 0.8% Cu¹
- Sue River: historic grab samples including 6.8% Cu²
- Jobs Hill: copper oxide zone, historic grab samples including 5% Cu³
- Florence Hill, Kingsweston, Providence: mineralized porphyries; magnetite-sulphide veins, historic chip samples including 3.2% Cu over 1m¹
- Allman Hill: tonalite and potassic altered granite; historic trench results 0.5% Cu over 58m⁴
- Mt Charles – Border: CIDA stream sediment results including 1710 ppb Au⁵

Hungry Gully Project

- Dunrobin and Diggins Ridge: porphyry target, historic soil samples including 4500 ppm Cu⁶
- Round Hill: Au-epithermal target; historic soil samples including 1500 ppb Au⁶
- Home Hill: large prospective area for copper as defined by CIDA stream sediment survey, including 203 ppm Cu and 44 ppm Au⁵

Main Ridge Project

- Pennants: 1km long gold anomaly in soils on strike with Ausjam's Pennants gold deposit – 82,000 t at 13.9 g Au/t (historic non-compliant 43-101)⁷
- Main Ridge: 3 km long untested copper in soil anomaly⁶
- Trout Hill: copper oxide with historic grab samples including 0.84% Cu¹

About Carube Copper Corp.

Carube Copper Corp. (CUC:TSXV) is a Canadian exploration company focused on the rapid exploration and development of precious metal and copper projects in Jamaica. Through a wholly owned Jamaican subsidiary, Carube owns a 40% beneficial interest (subject to a 2% NSR) in the Bellas Gate Project, which consists of two highly prospective copper-gold licenses covering 84 square kilometres of the Central Inlier. The Bellas Gate Project (“BGP”) is the subject of a joint venture agreement with OZ Minerals Limited (“OZ Minerals”), an Australian copper-gold producer with a market capitalization of over\$1B. OZ Minerals can earn a 70% interest (Carube 30%) in the BGP by spending \$6.5M on exploration and can then increase its interest a further 10% by completing a feasibility study. OZ Minerals also has flown airborne geophysics over 3 other Carube projects (4 wholly-owned Licences, subject to 2% NSRs, and subsequently can invoke separate joint ventures on each project with similar terms to those applicable to the BGP. Carube also holds a 100% interest in three porphyry copper-gold-molybdenum properties in southwestern British Columbia within the Tertiary-aged Cascade Magmatic Arc. Exploration continues on two of these projects, with the goal of them becoming of interest to funding partners.

Neither the TSXV nor its Regulation Services Provider (as that term is defined in the policies of the TSXV) accepts responsibility for the adequacy or accuracy of this release.

DISCLAIMERS AND FORWARD-LOOKING STATEMENTS

This News Release includes certain "forward-looking statements" which are not comprised of historical facts. Forward-looking statements include estimates and statements that describe the Company's future plans, objectives or goals, including words to the effect that the Company or management expects a stated condition or result to occur. Forward-looking statements may be identified by such terms as "believes", "anticipates", "expects", "estimates", "may", "could", "would", "will", or "plan". Since forward-looking statements are based on assumptions and address future events and conditions, by their very nature they involve inherent risks and uncertainties. Although these statements are based on information currently available to the Company, the Company provides no assurance that actual results will meet management's expectations. Risks, uncertainties and other factors involved with forward-looking information could cause actual events, results, performance, prospects and opportunities to differ materially from those expressed or implied by such forward-looking information. Forward looking information in this news release includes, but is not limited to, the Company's objectives, goals or future plans, statements, exploration results, potential mineralization, the estimation of mineral resources, exploration and mine development plans, timing of the commencement of operations and estimates of market conditions. Factors that could cause actual results to differ materially from such forward-looking information include, but are not limited to failure to identify mineral resources, failure to convert estimated mineral resources to reserves, the inability to complete a feasibility study which recommends a production decision, the preliminary nature of metallurgical test results, delays in obtaining or failures to obtain required governmental, environmental or other project approvals, political risks, inability to fulfill the duty to accommodate First Nations peoples, other indigenous peoples and land owners, uncertainties relating to the availability and costs of financing needed in the future, changes in equity markets, inflation, changes in exchange rates, fluctuations in commodity prices, delays in the development of projects, capital and operating costs varying significantly from estimates and the other risks involved in the mineral exploration and development industry, and those risks set out in the Company's public documents filed on SEDAR. Although the Company believes that the assumptions and factors used in preparing the forward-looking information in this news release are reasonable, undue reliance should not be placed on such information, which only applies as of the date of this news release, and no assurance can be given that such events will occur in the disclosed time frames or at all. The Company disclaims any intention or obligation to update or revise any forward-looking information, whether as a result of new information, future events or otherwise, other than as required by law.
